- Appointments are preferred but not required.
- Vaccinations are available in multiple locations and on weekdays, weekends, mornings, afternoons and evenings.
- Everyone 12 and older is now eligible.

### THEY ARE TESTED AND EFFECTIVE

110,000+ volunteers participated in three vaccine clinical trials. Clinical trials noted the vaccines are highly effective in preventing COVID-19.

### THEY ARE SAFE

The FDA and CDC authorized the vaccines noting that they are highly effective with no significant safety concerns. The vaccines cannot give you COVID-19. They do not use the live virus that causes COVID-19.

### NO MAJOR SIDE EFFECTS EXPECTED

Some people may have a sore arm, arm warmth, fatigue or a low-grade fever a day or two after receiving the vaccine.

### CELLS FIGHT THE VIRUS

When you receive the vaccine, it causes your immune system to produce antibodies to COVID-19 and to activate T-cells that can destroy infected cells.

### VACCINATION IS LIFE SAVING

Vaccination protects you, your family and friends, and helps end the pandemic.

### IT'S FREE

The COVID-19 vaccine is available for free, even if you don't have insurance.

### DOSES REQUIRED

Pfizer = two doses, 21 days apart or more.  
Moderna = two doses, 28 days apart or more.  
Johnson & Johnson = single dose.

### LIMITED INTERNET?

People with limited internet access should call 336-890-1188, Monday through Friday between 7 a.m. and 7 p.m. for scheduling assistance.
